

CHÂTEAU

IL SE PEUT QUE QUELQU'UN DISE :

HIINN NN UH UH UH...

FFFFFSHHHHHHHHH... PLUIE BATTANTE

OOUUUUUUUUIN SNNIIIIFF... PLEURE

SHHHBOUUUUUUMM!!!

RAPPROCHE

VIENS PETIT,
NE RESTE PAS LÀ...

SNIF...HHUUU??

TEND LA MAIN...

ÇA VA
PETIT ?

MES PARENTS ME
MANQUENT...

OUI JE
COMPRENDS
...

AGRIPPE

TU LES RETROUVERAS BIENTÔT !

GGGGRRRAAAAAAAA
AAAAOOOOOOOO
UUUUUUUUUUUUUUHHHHH!!!

?!!

UN DÉMON
VOLANT ?!

PREND L'ÉPÉE

FAUT QUE
J'ME METTE
À L'ABRI ET
VITE !!

JE NE PENSAIS
PAS RENCONTRER
CE GENRE DE
MONSTRE ICI...
ÇA SENT MALVAIS !

PROJETÉ EN ARRIÈRE

OUCHHH!!

CRRRAAACCKKK!

SCCHHHRAACKK!

SCCHHHRAACKK!

SCCHHHRAACKK!

FAUT QUE JE
DESCENDE
D'ICI !

SERRE

FRAPPE

SCCHIRAAACKK!

ÉTOURDI

ÇA Y EST !
ON PERD DE
L'ALTITUDE !

FFFFFFFFFFFFFFFFHHHHH!

DESCENTE

SHHHBOUHHHH!!!

AAAAAARRRRRG
GGGGHHHH!!!

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office for National Statistics 2000).

There is a growing awareness of the need to address the health care needs of the ageing population. The Department of Health (2000) has set out a vision for the future of health care for older people, and the National Institute for Clinical Excellence (NICE) (2000) has produced guidance on the management of common conditions in older people. The Department of Health (2000) also states that the health care system should be able to meet the needs of older people in a way that is cost-effective, efficient and of high quality. This paper reports on a study that was conducted in order to explore the health care needs of older people in the UK.

Methods

Study design

The study was a cross-sectional survey of the health care needs of older people in the UK. The study was conducted in 1999 and 2000. The study was conducted in order to explore the health care needs of older people in the UK.

Study population

The study population was defined as older people in the UK. The study population was defined as older people in the UK. The study population was defined as older people in the UK.

Study site

The study was conducted in the UK. The study was conducted in the UK. The study was conducted in the UK.

Data collection

Data were collected from older people in the UK. Data were collected from older people in the UK. Data were collected from older people in the UK.

Data analysis

Data were analysed using statistical methods. Data were analysed using statistical methods. Data were analysed using statistical methods.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office of National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (2000) has identified the need to develop a new paradigm of care for the ageing population, one that is based on the concept of 'active ageing'. This paradigm is based on the idea that ageing is a process, not a state, and that the goal of care should be to promote the health and well-being of older people, rather than to simply manage their decline. The Department of Health (2000) has identified a number of key areas for action, including: promoting the health and well-being of older people; improving the quality of life of older people; and ensuring that older people are able to live independently and actively.

The Department of Health (2000) has also identified a number of key areas for research, including: the health and well-being of older people; the quality of life of older people; and the needs of older people. The Department of Health (2000) has also identified a number of key areas for practice, including: promoting the health and well-being of older people; improving the quality of life of older people; and ensuring that older people are able to live independently and actively.

The Department of Health (2000) has also identified a number of key areas for policy, including: promoting the health and well-being of older people; improving the quality of life of older people; and ensuring that older people are able to live independently and actively. The Department of Health (2000) has also identified a number of key areas for legislation, including: promoting the health and well-being of older people; improving the quality of life of older people; and ensuring that older people are able to live independently and actively.
